Then, Siemens Sirius 3RW series is exactly what you need for them. One of the basic performance variants of that series is 3RW30 starter that helps to lower the voltage of induction motors by changing thyristor's opening phase. It also increases the time of accelerating from the nominal voltage up to wiring system voltage. Having a wide range of voltage from 75kW to 315kW it is suitable for motors with standard mode of starting. Sirius 3RW30 structure consist of several parts Soft starter Link module Cover for box terminals Terminal cover for cable lugs Auxiliary terminal Infeed terminal It is a perfect way to make your threephase asynchronous motors working stable and to increase their durability. Its merits are compact design, highlevel motor protection, standard application compatibility, and low prices. It also has integrated bypass contact system to provide soft starting of your electric motors. If you need soft starting and stopping for your conveying line or ventilation motors that is Sirius 3RW30 you actually need. You can order it online in the Eltra Trade web store. During starting, these devices limit the torque as well as the current and prevent the shocks which arise during direct starts or wyedelta starts. In this way, mechanical loads and mains voltage dips can be reliably reduced. Soft starting reduces the stress on the connected equipment and results in lower wear and therefore longer periods of trouble free production. The selectable start value means that the soft starters can be adjusted individually to the requirements of the application in question and unlike wyedelta starters are not restricted to twostage starting with fixed voltage ratios. The SIRIUS Siemens 3RW30261BB14 soft starters are characterized above all by their small space requirements.<http://epsilon-imaging.com/comdial-phone-system-manual-edge-120.xml>
